*Not a significant source of this nutrient.

Percent Daily Values are based on a 2000 calorie diet. Nutrients are highlighted if they contain at least 10% of the Daily Value. Percent Daily Values and Calories are rounded according to RDA rules for labeling. For purposes of comparison, all nutrients are those contained in 8 fluid ounces.

Nutrient values for products are shown for illustration-purposes only. Nutrient values shown are representative of products as reported in the USDA National Nutrient Database for Standard Reference (SR 28). USDA NDB Number: Low-fat milk 1% 01082; Low-fat reduced sugar chocolate milk 01305; Orange Juice 09209; Water 14555; Fruit-flavored drink 14646; Chocolate almond beverage 14054; Sports drink 14460; and Carbonated Cola 14400. Because amount of tryptophan is not listed for USDA 01305, niacin equivalents for the reduced-sugar chocolate milk were calculated with amounts listed in the low-fat chocolate milk 01082.

Sugars in beverages can include intrinsic and/or added sugars. Milk and orange juice naturally contain intrinsic sugars that are not considered "added sugars." Added sugars were calculated using the following information: 8 oz of milk contains 12 g intrinsic sugar (lactose); 8 oz of orange juice contains 21 g intrinsic sugars; all sugars in 8 oz. almond beverage (15 g), sports drink (13 g), and cola (16 g) are "added sugars."
